

"At Orange-Ulster BOCES, we dropped using formal textbooks and use Electude for all our automotive curriculum. Our students tell us Electude is a more interactive learning experience. I have been pleasantly surprised by the usefulness of Electude's ability to track student progress and have integrated the engine simulator into my classroom demonstrations – which also protects equipment from wear and tear. We progressed from using Electude modules as a lecture portion of training to using it to organize classes, design custom assignments and as an assessment tool to reinforce lecture and theory. I would recommend Electude to fellow teachers."

Matthew Dykes, Orange-Ulster BOCES, SUNY Rockland Community College, USA
